

# WorldCard Pro (Win/Mac)

## Portable A8 Color Scanner

### Product Overview

WorldCard Pro is an ergonomic and creative business card scanner with lighting and tilting open entry design. The entry design makes you put the business cards into the scanner through at a proper angle and scan the information easily and intuitively. After precise recognition, the information on the business card will immediately become your personal database of social network. Humanized design on USB cable gathering in the backside of device simplifies the extra cable placement. On-the-go professionals find it a great companion to bring along on business trips to file contact info into a database before returning to the office.

### Software Features
